Toxicology 134 (1999) 213–215

TOXICOLOGY

Subject index of volume 134

Acetaldehyde; HepG2 cells; Ethanol; LPS; Cytokines; Growth factors; Oxidative stress **134**, 197

Adriamycin; Oxygen free radicals; Creatine kinase; Cardiomyocytes; Cardiotoxicity **134**, 51

Adult F344 rats; Delayed-type hypersensitivity; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin **134**, 79

Allergy; Hexahydrophthalic anhydride; Autoradiography; Inhalation; Distribution **134**, 153

***δ*-Aminolevulinate dehydratase**; Lead poisoning; Mother; Newborn; Toxicological threshold; Epidemiology **134**, 143

Antioxidants; Apoptosis; Cerebellar granule cells; EPC-K1; Lipid peroxidation; Nitric oxide **134**, 117

Apoptosis; Antioxidants; Cerebellar granule cells; EPC-K1; Lipid peroxidation; Nitric oxide **134**, 117

Apoptosis; DNA fragmentation; Metallothionein; Thymus **134**, 39

Apoptosis resistance; LoVo; LoVoDx cells; Doxorubicin; Okadaic acid; Cantharidic acid **134**, 109

Aromatic amines; Bioactivation; Chemical carcinogenesis; Cytochrome P450; Mutagenicity **134**, 127

Autoradiography; Hexahydrophthalic anhydride; Inhalation; Distribution; Allergy **134**, 153

Bioactivation; Aromatic amines; Chemical carcinogenesis; Cytochrome P450; Mutagenicity **134**, 127

Biomarkers; Chemoprevention; Colon cancer; Diet **134**, 93

Biomonitoring; Propylene oxide; Hemoglobin adducts; Rat; Toxicokinetics **134**, 1

Calcium; *Meso*-2,3-dimercaptosuccinic acid; Homeostasis; Lead **134**, 19

Cantharidic acid; LoVo; LoVoDx cells; Doxorubicin; Okadaic acid; Apoptosis resistance **134**, 109

Cardiomyocytes; Adriamycin; Oxygen free radicals; Creatine kinase; Cardiotoxicity **134**, 51

Cardiotoxicity; Adriamycin; Oxygen free radicals; Creatine kinase; Cardiomyocytes **134**, 51

Cerebellar granule cells; Antioxidants; Apoptosis; EPC-K1; Lipid peroxidation; Nitric oxide **134**, 117

Chemical carcinogenesis; Aromatic amines; Bioactivation; Cytochrome P450; Mutagenicity **134**, 127

Chemical warfare agent; Hairless guinea pig; Human skin keratinocyte culture; Hypothermia; Neuron culture; L-nitroarginine methyl ester, L-NAME; Protection; Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Temperature; Toxicity **134**, 27

Chemoprevention; Biomarkers; Colon cancer; Diet **134**, 93

Children; Lead; Immune system; Immunity; IgE **134**, 63

Colon cancer; Biomarkers; Chemoprevention; Diet **134**, 93

Creatine kinase; Adriamycin; Oxygen free radicals; Cardiomyocytes; Cardiotoxicity **134**, 51

Cytochrome P450; Aromatic amines; Bioactivation; Chemical carcinogenesis; Mutagenicity **134**, 127

Cytokines; Fever; Temperature regulation; Organophosphate; Pesticide **134**, 9

Cytokines; HepG2 cells; Ethanol; Acetaldehyde; LPS; Growth factors; Oxidative stress **134**, 197

Delayed-type hypersensitivity; Adult F344 rats; 2,3,7,8-Tetrachlorodibenzo-*p*-dioxin **134**, 79

Diet; Biomarkers; Chemoprevention; Colon cancer **134**, 93

PII: S0300-483X(99)00058-X

Distribution; Hexahydrophthalic anhydride; Autoradiography; Inhalation; Allergy **134**, 153

DNA fragmentation; Apoptosis; Metallothionein; Thymus **134**, 39

Doxorubicin; LoVo; LoVoDx cells; Okadaic acid; Cantharidic acid; Apoptosis resistance **134**, 109

EPC-K1; Antioxidants; Apoptosis; Cerebellar granule cells; Lipid peroxidation; Nitric oxide **134**, 117

Epidemiology; Lead poisoning; δ-Aminolevulinate dehydratase; Mother; Newborn; Toxicological threshold **134**, 143

Eptastigmine; Pyridostigmine; Physostigmine; Phosphotriesterase; Sarin; Mice **134**, 169

Ethanol; HepG2 cells; Acetaldehyde; LPS; Cytokines; Growth factors; Oxidative stress **134**, 197

Fever; Cytokines; Temperature regulation; Organophosphate; Pesticide **134**, 9

Growth factors; HepG2 cells; Ethanol; Acetaldehyde; LPS; Cytokines; Oxidative stress **134**, 197

Hairless guinea pig; Chemical warfare agent; Human skin keratinocyte culture; Hypothermia; Neuron culture; L-nitroarginine methyl ester, L-NAME; Protection; Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Temperature; Toxicity **134**, 27

Hemoglobin adducts; Propylene oxide; Biomonitoring; Rat; Toxicokinetics **134**, 1

Hepatotoxicity; Perfluorodecanoic acid; Peroxisome proliferator **134**, 179

HepG2 cells; Ethanol; Acetaldehyde; LPS; Cytokines; Growth factors; Oxidative stress **134**, 197

Hexahydrophthalic anhydride; Autoradiography; Inhalation; Distribution; Allergy **134**, 153

Homeostasis; *Meso*-2,3-dimercaptosuccinic acid; Calcium; Lead **134**, 19

Human skin keratinocyte culture; Chemical warfare agent; Hairless guinea pig; Hypothermia; Neuron culture; L-nitroarginine methyl ester, L-NAME; Protection; Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Temperature; Toxicity **134**, 27

Hypothermia; Chemical warfare agent; Hairless guinea pig; Human skin keratinocyte culture; Neuron culture; L-nitroarginine methyl ester, L-NAME; Protection; Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Temperature; Toxicity **134**, 27

IgE; Lead; Immune system; Immunity; Children **134**, 63

Immune system; Lead; Immunity; IgE; Children **134**, 63

Immunity; Lead; Immune system; IgE; Children **134**, 63

Inhalation; Hexahydrophthalic anhydride; Autoradiography; Distribution; Allergy **134**, 153

Lead; Immune system; Immunity; IgE; Children **134**, 63

Lead; *Meso*-2,3-dimercaptosuccinic acid; Homeostasis; Calcium **134**, 19

Lead poisoning; δ-Aminolevulinate dehydratase; Mother; Newborn; Toxicological threshold; Epidemiology **134**, 143

Lipid peroxidation; Antioxidants; Apoptosis; Cerebellar granule cells; EPC-K1; Nitric oxide **134**, 117

L-nitroarginine methyl ester, L-NAME; Chemical warfare agent; Hairless guinea pig; Human skin keratinocyte culture; Hypothermia; Neuron culture; Protection; Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Temperature; Toxicity **134**, 27

LoVoDx cells; LoVo; Doxorubicin; Okadaic acid; Cantharidic acid; Apoptosis resistance **134**, 109

LoVo; LoVoDx cells; Doxorubicin; Okadaic acid; Cantharidic acid; Apoptosis resistance **134**, 109

LPS; HepG2 cells; Ethanol; Acetaldehyde; Cytokines; Growth factors; Oxidative stress **134**, 197

***Meso*-2,3-dimercaptosuccinic acid**; Homeostasis; Calcium; Lead **134**, 19

Metallothionein; DNA fragmentation; Apoptosis; Thymus **134**, 39

Mice; Pyridostigmine; Physostigmine; Eptastigmine; Phosphotriesterase; Sarin **134**, 169

Mother; Lead poisoning; δ-Aminolevulinate dehydratase; Newborn; Toxicological threshold; Epidemiology **134**, 143

Mutagenicity; Aromatic amines; Bioactivation; Chemical carcinogenesis; Cytochrome P450 **134**, 127

Neuron culture; Chemical warfare agent; Hairless guinea pig; Human skin keratinocyte culture; Hypothermia; L-nitroarginine methyl ester, L-NAME; Protection; Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Temperature; Toxicity **134**, 27

Newborn; Lead poisoning; δ-Aminolevulinate dehydratase; Mother; Toxicological threshold; Epidemiology **134**, 143

Nitric oxide; Antioxidants; Apoptosis; Cerebellar granule cells; EPC-K1; Lipid peroxidation **134**, 117

Okadaic acid; LoVo; LoVoDx cells; Doxorubicin; Cantharidic acid; Apoptosis resistance **134**, 109

Organophosphate; Fever; Cytokines; Temperature regulation; Pesticide **134**, 9

Oxidative stress; HepG2 cells; Ethanol; Acetaldehyde; LPS; Cytokines; Growth factors **134**, 197

Oxygen free radicals; Adriamycin; Creatine kinase; Cardiomyocytes; Cardiotoxicity **134**, 51

Perfluorodecanoic acid; Peroxisome proliferator; Hepatotoxicity **134**, 179

Peroxisome proliferator; Perfluorodecanoic acid; Hepatotoxicity **134**, 179

Pesticide; Fever; Cytokines; Temperature regulation; Organophosphate **134**, 9

Phosphotriesterase; Pyridostigmine; Physostigmine; Eptastigmine; Sarin; Mice **134**, 169

Physostigmine; Pyridostigmine; Eptastigmine; Phosphotriesterase; Sarin; Mice **134**, 169

Propylene oxide; Biomonitoring; Hemoglobin adducts; Rat; Toxicokinetics **134**, 1

Protection; Chemical warfare agent; Hairless guinea pig; Human skin keratinocyte culture; Hypothermia; Neuron culture; L-nitroarginine methyl ester, L-NAME; Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Temperature; Toxicity **134**, 27

Pyridostigmine; Physostigmine; Eptastigmine; Phosphotriesterase; Sarin; Mice **134**, 169

Rat; Propylene oxide; Biomonitoring; Hemoglobin adducts; Toxicokinetics **134**, 1

Sarin; Pyridostigmine; Physostigmine; Eptastigmine; Phosphotriesterase; Mice **134**, 169

Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Chemical warfare agent; Hairless guinea pig; Human skin keratinocyte culture; Hypothermia; Neuron culture; L-nitroarginine methyl ester, L-NAME; Protection; Temperature; Toxicity **134**, 27

Temperature; Chemical warfare agent; Hairless guinea pig; Human skin keratinocyte culture; Hypothermia; Neuron culture; L-nitroarginine methyl ester, L-NAME; Protection; Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Toxicity **134**, 27

Temperature regulation; Fever; Cytokines; Organophosphate; Pesticide **134**, 9

2,3,7,8-Tetrachlorodibenzo-*p*-dioxin; Delayed-type hypersensitivity; Adult F344 rats **134**, 79

Thymus; DNA fragmentation; Apoptosis; Metallothionein **134**, 39

Toxicity; Chemical warfare agent; Hairless guinea pig; Human skin keratinocyte culture; Hypothermia; Neuron culture; L-nitroarginine methyl ester, L-NAME; Protection; Sulphur mustard, bis(2-chloroethyl) sulphide, HD; Temperature **134**, 27

Toxicokinetics; Propylene oxide; Biomonitoring; Hemoglobin adducts; Rat **134**, 1

Toxicological threshold; Lead poisoning; δ-Aminolevulinate dehydratase; Mother; Newborn; Epidemiology **134**, 143
